

The GLADLA Shoreland Stewardship Committee is ready to help our members protect and naturally improve our lakefronts. Our knowledgeable Shoreland Ambassadors will make a “house call” for a complimentary shoreline consultation.

The ambassadors can provide information and resources for caring for your Green Lake or Duck Lake shoreland and discuss proven best practices for your specific property.

Topics could include responsible fertilization practices, septic maintenance, storm run-off, identifying invasives, erosion reduction, types and sources of native plant seeds and seedlings, and enhanced near-shore wildlife habitats.

We can also help riparians understand what projects may require a Michigan Department of Environment, Great Lakes, and Energy (EGLE) permit.

If interested, please make your request through the GLADLA.org website by providing your name, address, email, and phone number.

We look forward to supporting your care of our beautiful Shorelands.

LOVE OUR LAKES
